Summary

Full-Stack Developer specializing in the MERN Stack and Next.js. Proficient in React.js, Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, implementing secure authentication systems, and developing responsive, production-ready web applications. Strong foundation in clean architecture, performance optimization, and modern development workflows. Passionate about building scalable and user-focused digital solutions.

EDUCATION

December2023–July 2027 UAF, Bachelor of Science in Information Technology

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS,
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
AI Coding Tools: GitHub Copilot, ChatGPT, Claude AI, Gemini AI,
Tools: Git, GitHub, Postman, VS Code, Cursor

PROJECTS

RapidQuiz – AI-Powered Quiz Management System

- Developed a full-stack AI-powered quiz management system with separate Teacher and Student portals for creating, managing, attempting, and evaluating quizzes.
- Implemented AI-based automatic grading for descriptive questions using the Google Gemini API, providing marks and feedback based on teacher-defined evaluation criteria.
- Built features including quiz creation, MCQs and long-answer support, autosave, secure submission, result analytics, Excel export, and responsive user interfaces.
- Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Google Gemini API.

TobaTravels – Railway Information & Live Train Tracking System

- Developed a railway information system that allows users to search Pakistan Railways schedules, fare details, and live train status through a responsive web interface.
- Evolved the application from a manually maintained timetable system to an integrated solution using the official Pakistan Railways website for real-time fare information and train updates.
- Implemented live train tracking for Toba Tek Singh Railway Station to help travelers monitor arrivals and departures.
- Tech Stack: HTML, CSS, Tailwind CSS, JavaScript.

Bank Transaction Management System

- Built a full-stack banking backend application by implementing industry-standard concepts including user authentication, account management, and secure transaction processing.
- Implemented features such as JWT-based authentication, password hashing with bcrypt, email notifications, ledger-based transaction tracking, idempotent transaction handling, and secure logout using token blacklisting.
- Applied production-oriented backend practices including MongoDB database sessions for atomic transactions, modular architecture, and RESTful API design.
- Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Nodemailer.

SmartKhata – Business Expense Tracker

- Developed a full-stack business expense tracking application that enables users to record, organize, and manage daily income and expenses through a clean and responsive interface.
- Implemented CRUD functionality for adding, updating, deleting, and categorizing financial records, helping users monitor business transactions efficiently.
- Built a RESTful backend with secure database integration to store and retrieve expense data, ensuring smooth and reliable record management.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS.
